

**WILLKOMMEN! BIENVENUE! WELCOME!**

to the world of

**MagicWorkbooks®**

# FoodCostManager

This is a **Magic**Workbook: a controlling tool in the form of a Microsoft Excel file.

No macros, no write protection. All formulas used are visible.

All formats used are standard Excel which transform into your country's Excel formats.

You can import your DATA from any source that supports MS Excel.

You can also add your own worksheets as you see fit.

## System requirements

Platform: Windows 98 or later operating system  
Microsoft Excel Version: 2007 or later  
(You need a xls format (excel 2003) – send us a short information after you placed the order – [support@magicworkbooks.com](mailto:support@magicworkbooks.com) - we'll send you the ordered xls MagicWorkbook by email)

## Product Survey

You have always wanted an easy-access summary of all your food cost calculations but never had the time to compile them?

And wouldn't it be nice to have an automatic link to your latest food price list to save you from re-calculating everything several times per year?

And how about getting rid of all those single sheets with the hand-written notes and having a dynamic food cost library for fast and easy new calculations and automatic price-checks?

And how about having an automatic calculation of the calories per serving for all your recipes thrown in

***Then FoodCostManager is the tool for you !***

- FoodCostManager comprises a library of 75 food cost calculations all of them linked to your actual pricelist.
- Just one change of price in your list - and every single calculation will be automatically adjusted and the results shown in a colour-coded survey!
- You have a lot more than 75 food cost calculations to work with? Well, just copy FoodCostManager a couple of times: one copy for Main dishes, one for Starters, one for Desserts ...

31		Big Mac, McDonald's*	pack	2.500	5,08	
32		biscuit	pack	2.500	9,35	

**Please note the following for this data input:**

- 1. You can input up to 1.000 different items. Overwrite the demo data with your own pricelist.**
- IMPORTANT! Do not delete rows, enter new rows, or drag&drop! Leaving some rows empty is no problem.**
- 2. If you copy from or link to another source, please take note of the format requirements as follows:**
  - 2a. "Product Group" in column B is optional. It can be helpful in searching for an item but is not necessary. The same goes for "Unit" in column D.**
  - 2b. Take care to input a "calculable" value in column E (gram, ounce, pound...). So no interesting input such as "1 or 2 pieces" or "approx. 5 ounces". Just a number!**
- 3. If you want to have calories per serving calculated, be sure to enter the number of calories per unit! e.g. sugar has about 400 calories per 100 gr. Your buying unit for sugar is 10 kilograms. So the corresponding calories would be 400 x 100 = 40,000 calories.**

■■■

In what way do **MagicWorkbooks**<sup>®</sup> differ from normal Excel workbooks?

**MagicWorkbooks** are easier to use:

- Easy-to-handle data input with demo data for orientation
- All data to be entered only once
- No programming knowledge required
- No detailed knowledge of Microsoft Excel required
- No work on spreadsheets or charts required
- No scrolling for sheets thanks to a Hyperlink-table of contents

**MagicWorkbooks** are faster:

- A monthly report with 20 spreadsheets and 20 charts in 20 minutes?
- Calculate year-end liquid reserves with changes in revenue prediction for every month in half an hour?
- Compute balance sheets for the next five years in one hour?
- Decision on a \$ 50 million sale-and-lease-back operation: Prepare all relevant data in one hour?
- Determine capital re-investment requirements (fixed assets) for the next year in 10 minutes?
- Prepare a comprehensive company presentation for your bank in one hour?

With **MagicWorkbooks** all that is „business as usual“!

This was just a brief survey ...
